present application be passed to issue.

Respectfully Submitted

Richard B. Klar

Reg No. 31, 385 875 Ave of the Americas, Suite 2301 New York, NY 10001 Tel:212-279-2991 Fax 212-279-3098

AMENDED VERSION:

--2.(Twice Amended) A toy comprising:

a security alarm [device] system comprising a controller and having an armed state and an unarmed state, the controller being responsive to a signal input to at least one input thereof to cause the security alarm [device] system to selectively assume the armed and unarmed states;

a signaling device coupled to the controller and responsive to provide an audio or visual alarm signal;

the controller causing the signaling [device] system provide an alarm signal with a change of state of the security alarm [device] system for said toy between the armed state and the unarmed state.—

--24. (Amended) A toy comprising:

a security alarm [device] <u>system</u> comprising a controller activation of an alarm, the security alarm having an armed state and an unarmed state, the controller being responsive to a signal provided to at least one input of the controller to cause the security alarm [device] system <u>for said toy</u> to selectively assume the armed and unarmed states;

a signaling device coupled to the controller and responsive to provide at least one first audio or visual alarm signal representing a change in state of the security alarm [device]. system—

--30 (Amended) A toy comprising:

a security alarm [device] <u>system</u> comprising a controller and having an armed and unarmed state, the controller being responsive to at least one input thereof to cause the security alarm device <u>for said toy</u> to selectively assume the armed and unarmed [device] system—
